

GEORGETOWN UNIVERSITY

Course: ECON 612 – Econometrics I
Term: Fall 2016
Level: Ph.D.
TA: Umberto Muratori

[5] - Outstanding [4] - Very Good [3] - Good [2] - Fair [1] - Poor

Teaching Assistant Evaluation

	Mean
Does the atmosphere in recitation encourage participation?	5.00
Does the TA answer questions well?	5.00
Does the TA present course materials in a clear and understandable way?	5.00
Does the TA have good knowledge of course material?	5.00
Was the TA well-prepared and well-organized?	5.00
Does the TA grade quizzes and problem sets fairly?	5.00
Was the TA helpful during office hours?	5.00
What degree are you satisfied with the performance of the TA?	5.00

Selected Comments

- He had a perfect understanding on assignment problems.
- He taught econometrics with passion. He was willing to start from basic building blocks with intuition; he kept connecting the dots and similar material seen in different context; he encouraged participation and he was willing to help on extra time.
- Umberto thoroughly reviewed both problem sets and practice Comp questions to ensure our class was exposed to and understood the key concepts presented throughout the semester. He gave very detailed explanations and drew on his expansive knowledge of the material to facilitate productive recitations and office hours. Umberto also went above and beyond his regular responsibilities by expanding office hour sessions and frequently staying after recitation to answer questions and to reinforce concepts for students who were struggling. The review was an integral part of our cohort's success this semester and we're grateful to Umberto for being so generous with his time.
- Patience in answering questions.
- The office hour on linear algebra was really helpful. Hope there could be more sessions like that in which Umberto went over some basic stuff.
